

Jillian Piske, MA, QMHP

Behavioral Health Team Lead

Philosophy of Care

I try to create a safe and open environment in order for my clients to explore the barriers that keep them from achieving the goals they have.

Education and Certification

Bachelors in Psychology from NIU, Masters in Clinical Counseling from Lewis University

Specialization

I really enjoy working with children and adolescents.

A little bit about me...

I enjoy going to concerts and music festivals, spending time with my family and friends, going swimming in the summer, reading, and trying new restaurants. I also have a very fluffy cat named Minerva (based off a character in Harry Potter), but we call her Minny for short.
