

Monica Benesh

Pathways Care Coordinator

Specialization

Primary and Behavioral Health Care Coordination.

My Treatment Philosophy

Building a client-centered rapport as the building blocks for guidance and support, is most important. Creating a “safe space” for open and effective communication to better navigate the status of treatment.

A little bit about me...

My family means everything to me. I also enjoy attending my kids’ sporting events, reading a good book, traveling, and you can always find me in the kitchen cooking!
