

Hannah Anderson, MHP

Behavioral Health Intern

Education and Certification

I have received my Bachelors of Psychology from Northern Illinois University. I am currently attending Liberty University to earn my Masters in Clinical Mental Health Counseling.

Specialization

I primarily work with kids ages four and up.

My Treatment Philosophy

I enjoy utilizing play therapy and art therapy when working with kiddos. I practice a very client-centered approach, working in conjunction with my clients to determine the best possible path, goals, and treatment outcomes. Working to foster a strong therapeutic alliance is a crucial part to my approach.

A little bit about me...

When I'm not at work, you can often find me going for hikes or being in the woods with my dog. I also enjoy a good coffee shop, bible study, and spending time with my family. I have a passion for law enforcement and mental health, and I'm working to best combine these passions.
