**My Treatment Philosophy**

It's grounded in compassion, evidence-based practice, and collaborative care. I believe effective mental health treatment begins with understanding each child, adolescent, and adult within the context of their family, environment, and stage of development. I emphasize thoughtful assessment, individualized treatment planning, and collaboration with families to promote emotional well-being, resilience, and long-term stability across the lifespan.

**A little bit about me**

I'm a former Chicago Police Officer and very well versed in trauma focused care. In addition, Gladys loves traveling, dancing, fitness, and spending time with family.
